PROFESSIONAL SUMMARY

Experienced occupational therapist turned data enthusiast seeking a position within analytics. Six years of professional experience incorporating qualitative and quantitative data analysis to solve problems and guide data-driven business decisions, with a passion for further learning to pursue data analytics in a full-time capacity. Developed skills needed to prepare, process, and analyze data for key insights; effectively share findings, and provide data-driven recommendations through the Google Data Analytics Professional Certification. Seen as a strong communicator and team leader with proficiency in the technical and collaborative skills required to become a valuable asset in this position.

SKILLS

SQL | Data gathering | Data Cleaning | Tableau | R | Data analysis | HIPAA & Data Security
Communication | Time management | Organization | Interpersonal skills | EMR Experience

WORK EXPERIENCE

- Team Supervisor, Skills 4 Life Pediatric Therapy, Boulder, Colorado** January 2022 – Present
- Increased therapists' productivity from 45% to 70% productivity during historically slow time periods by analyzing data and creating powerful visualizations with use of SQL and Tableau
 - Facilitated 20% growth of clinic by overseeing hiring, training, and professional development of employees while maintaining personal caseload of clients
 - Managed a team of five and provided education and support regarding various EMR systems, medical billing, health insurance, use of ICD-10 and CPT codes, medical terminology, and overall healthcare data
- Occupational Therapist, Skills 4 Life Pediatric Therapy, Boulder, Colorado** November 2020 – Present
- Improved patient and families' understanding of therapy progressions through use of quantitative and qualitative data modeling and visualizations.
 - Increased team members' efficiency by 50% through modification of workflow processes and organization of materials in order to expand availability for billable patient care hours
 - Established and maintained clear communication with parents of 20+ students on weekly basis while ensuring coordination of care with other professionals and maintaining HIPAA protocols
 - Maximized use of clinical data during evaluation and treatment process to develop data-backed treatment plans and provide meaningful insights to patients and families
- Occupational Therapist, Gateways Community Services, Nashua, New Hampshire** May 2019 – January 2021
- Managed time efficiently to ensure timeliness of session start times, scheduling of meetings, and completion of additional responsibilities and research
 - Contributed to weekly meetings with knowledge and research to encourage positive and purposeful engagements between members of the therapy team
 - Successfully problem solved in unclear therapeutic situations through research and analysis of client challenges and family resources
